SWS Bearings LTD
High Quality Bearing Manufacturer

***SWS Bearings LTD** is one of the most reliable bearings factories and exporters in China.We mainly supply roller and ball bearings.*

SWS was founded in 2001, located Chang Zhou city,jiang su Province.It just takes around 2 hours from Chang Zhou to Shanghai by car, and very convenient transportation. In 2005,Mokia has invested three factories in Shandong, and Dalian city. Our products sell worldwide.

Our products and service include:

1.Clutch Release Bearings
2.Miniature and middle-large size deep groove ball bearing
3.Double-row self-aligning roller bearing
4.Four-row heavy type cylindrical roller bearing
5.Self-aligning roller bearing
6.Axial thrust ball bearing, thrust ball and roller bearing
7.Single and double taper roller bearing
8.Needle roller bearing
9.High precision spindle bearing
10.Pillow block bearing, bush, steel balls

SWS bearings are widely used in railway,mining,mechanical equipment, automobile,ship, metallurgy, petrifaction, electric power, agriculture, textile and aviation, etc.

U-Joint Features

Demanding operating conditions require the best in design, metallurgy and manufacturing. Universal drive shafts and components are manufactured from the highest quality alloy steels and heat treated in our own furnaces to deliver extended wear with exceptional performance. Closed Eye, Split Eye & Block Type sizes are available from 220-800 mm. Most sizes are outfitted with our exclusive four-lip cup sealing design which provides an extra measure of protection with regard to preventing leakage and contamination.

Four–point lubrication is standard to provide adequate lube to all four bearings. A variety of flange connections; face key, integral face pad, welded and hirth serration are available. For telescoping applications, take advantage of our internal manufacturing capabilities which allow us to supply long travel (slip) requirements.

Past the sale, We will support all applications with a balance of inventory and repair services dedicated to supporting a customers needs.

Universal Joint Driveshaft
Design and Manufacturing Information

Yoke Design

The one piece, closed eye design is made with a reliable and robust yoke manufactured from specialty heat treated alloy steel. Our one piece yoke has the advantage of no maintenance to verify if bolted connections have loosened and the elimination of precision matching of components.

Cross & Bearing Kit Design

Our cross and bearing kits are designed and manufactured to handle the loads and operating conditions in a variety of heavy duty industrial applications. Our crosses are made from carburized and heat treated alloy steel while all crown rollers are made from 52100 steel and hardened to 62-65 HRC. All crosses are outfitted with four separate lube points to ensure proper lubrication to all bearing cups and rollers for smooth, trouble – free operation. Our multi-lip bearing cup sealing system eliminates the normal problems associated with leakage and contamination and most sizes are outfitted with our 4-lip configuration.

Flange Connections

We offers four standard flange connections; Face Key, Integral Face Pad, Welded and Hirth Serration. We will carefully consider the operating requirements of each and every application allowing us the ability to offer the best possible flange connection designed to maximize your operating performance.

Face Key

Hirth Serration

Integral Face Pad

Welded
